SUMMARY

Detail-oriented Software Developer with a passion for writing clean, optimized code and solving complex computational problems. Proficient in Java, Python, and SQL, with hands-on experience designing scalable microservices, managing databases, and implementing real-time web applications. A quick learner with strong CS fundamentals, dedicated to building efficient, production-ready software solutions.

EDUCATION

VIT Bhopal University BTech in CSE (CGPA: 8.66/10.00)	Bhopal, India 2023 – 2027
Shalom Hills International School CBSE Class XII (92.6%) CBSE Class X (90.3%)	Gurgaon, India 2021 – 2023

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, HTML/CSS
CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, Exploratory Data Analysis (EDA), Generative AI
Frameworks & Tools: Flask, Streamlit, Amazon Web Services, Git/GitHub, Render, REST API
Databases: MySQL

PROJECTS

- 1. Simhashta: Autonomous Smart Crowd Routing and Safety Control Room** | [GitHub](#)
Full-Stack Web & ML Engineering Project *Python, Scikit-learn, GoogleMaps API, Websockets, Fast API*
 - Developed a smart safety control room for Simhashta Kumbh Mela, the world's largest human gathering.
 - Utilizing an A* routing engine that prevents stampedes with a low 10.85ms latency across a 5,000-node graph.
 - Architected a real-time FastAPI backend broadcasting live updates every 2s and predicting 39.3M+ visitors.
- 2. HealBridge AI: Intelligent Symptom-Based Disease Prediction System** | [GitHub](#)
Full-Stack Web & AI Engineering Project *Python, Flask, Scikit-learn, Pickle, HTML/CSS/JS*
 - Engineered a Flask-based web application utilizing machine learning pipelines for real-time disease diagnosis.
 - Integrated ML pipelines to accurately predict diseases, achieving 85%+ accuracy on a dataset of 100+ symptoms.
 - Reduced symptom entry time by 60% and improved UX by implementing a streamlined, categorized input system.
- 3. ImpACT: AI-Augmented Civic Action Platform** | [GitHub](#)
Data Science & ML Engineering Project *Python, Node.js, MongoDB, YOLO, React*
 - Developed a Pan-India web platform that automates civic complaint triage and municipal officer routing.
 - Trained a custom YOLOv8 model over 100 epochs to detect civic hazards, achieving 0.89 precision on real-world citizen images.
 - Built a Python/Flask ML microservice to serve real-time inferences, maintaining <450ms latency under 500 concurrent requests.

LEADERSHIP & EXTRACURRICULARS

Google Developer Groups VIT Bhopal | Core Team Member | [Certificate](#) Nov 2024 – Jun 2025

CERTIFICATIONS

- **IBM** – IBM Generative AI Engineering [Certificate](#)
- **ORACLE** – Oracle Database@AWS Certified Architect Professional [Certificate](#)
- **NPTEL** – Introduction to Machine Learning [Certificate](#)
- **IBM** – Machine Learning with Python with Honors [Certificate](#)
- **Google** – Bits and Bytes of Computer Networking [Certificate](#)
