SUMMARY

Results-oriented **Computer Science** undergraduate (**8.55 CGPA**) with robust expertise in **Python**, **C++**, and **Full Stack Development**. **AWS Cloud Practitioner** certified with a proven track record of engineering scalable solutions, including a legal AI tool that reduced hallucination rates by **40%**. Skilled in **Data Structures**, **Algorithms**, and deploying **Machine Learning** models using **Flask**, committed to delivering high-performance software architectures.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Java
- **Machine Learning & DL:** TensorFlow, PyTorch, Scikit-learn
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn
- **Web Development:** HTML, CSS, JavaScript, Flask
- **Tools & Platforms:** Amazon AWS, Microsoft Office, Git, VS Code
- **Database:** MySQL, MongoDB

PROJECTS

PIL Generation using Generative AI

Developed AI-powered legal document generator for PIL creation across Indian legal frameworks.

- **Spearheaded** the development of a generative AI model utilizing **GPT-2** to automate the drafting of Public Interest Litigation (PIL) documents, training the system on a dataset of **200+ legal articles**.
- **Optimized** model hyper parameters by adjusting temperature settings to 0.6, successfully **reducing hallucination rates by 40%** and ensuring high factual consistency across 4+ Indian legal frameworks.

Heal-Bridge AI

Built health prediction web app for real-time disease diagnosis based on symptoms.

- **Engineered** a robust 3-tier web application using **Flask** and **Machine Learning** pipelines to deliver real-time disease diagnosis, achieving **85%+ prediction accuracy** across a dataset of 100+ symptoms.
- **Revamped** the user input interface by implementing a categorized selection system, cutting symptom entry time by **60%** and significantly enhancing the user experience.

CERTIFICATIONS

- **NPTEL** - Introduction to Machine Learning (Regression, Classification, Model Evaluation)
- **AWS** - AWS Cloud Practitioner Essentials
- **IBM** - Machine Learning with Python with Honors
- **IBM** - Deep Learning and Artificial Neural Networks Using Keras

EDUCATION

VIT BHOPAL UNIVERSITY

Bachelor of Technology

Major in Computer Science and Engineering

Cumulative GPA: 8.49/10

Relevant Coursework: Data Structure and Algorithm, Database Management System, Operating System

Bhopal, Madhya Pradesh

2023-Present

SHALOM HILLS INTERNATIONAL SCHOOL

Class 12 Percentage: 92.6%

Class 10 Percentage: 90.3%

Gurgaon, Haryana

May 2023

May 2021
